The game is actually alright. Im the first one to write a review for this game, and I might be the first or second person to actually buy the game. It was 69 cents (\$1 without sale) so I decided to buy it. The concept is interesting and is really fun for a casual game and its price. I can tell that it's mostly just a test game for the devs. This might just be a prototype or something, but it's still good. There are, however, a few flaws. There is no save option that I am aware of. If you mess up, you die. You have to start from the very beginning. At the time of writing this I think I've only made it to level 8. But how many levels ARE there? I would be reallyu2665u2665u2665u2665u2665u2665if I found out that the one level that I messed up on was the LAST one, and I had to do the game all over again. Now maybe make an OPTION for this, but as far as Im concerned, if you mess up, you have to restart the game. Overall, the game is fun, addictive and very hard. It's worth buying if you like a challenge. If you're looking for a game where you can run through levels and relax, just find a different game. I still recommend it, because as I've said, it's still fun and addictive.. The game is actually alright.
